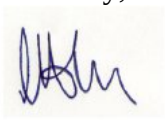
Dear Representative,

On behalf of over one million FreedomWorks members nationwide, I urge you to sign onto the Republican Study Committee Health Care Working Group's letter asking the Republican leadership to introduce an alternative health care plan with no mandates. We applaud the Republican leadership for passing the Repealing the Job-Killing Health Care Law Act. The next step is to devise an alternative health care plan that will truly lower costs and improve health care quality.

The American health care is in desperate need of free market reform. The health care law passed last March sets us in the wrong direction of more government control. It includes numerous mandates including the individual mandate, employer mandate, state mandates and so on. All of these mandates are a clear violation of our liberties.

The American people overwhelmingly oppose the new health care law. The system must be replaced with a patient-centered approach to health care. The House Republican leadership should instead introduce a free market health care solution that includes no mandates. Signing onto the Republican Study Committee Health Care Working Group's letter will show that you are committed towards improving the quality of health care.

Sincerely,



Matt Kibbe
